Introduction

Roxio Toast Titanium is software that helps you burn CDs or DVDs through your computer.

Here are some of the things you can do with Toast:

- Save your data to CD or DVD.
- Create audio or MP3 discs.
- Create Video CDs (VCDs), Super Video CDs (SVCDs), or DVDs.
- Make backup copies of your discs.

Launch Roxio Toast Titanium

1. First, find Roxio Toast in a Finder window. This can be found under Applications → Toast 8 Titanium → Toast Titanium.

Click on the Toast Titanium icon:

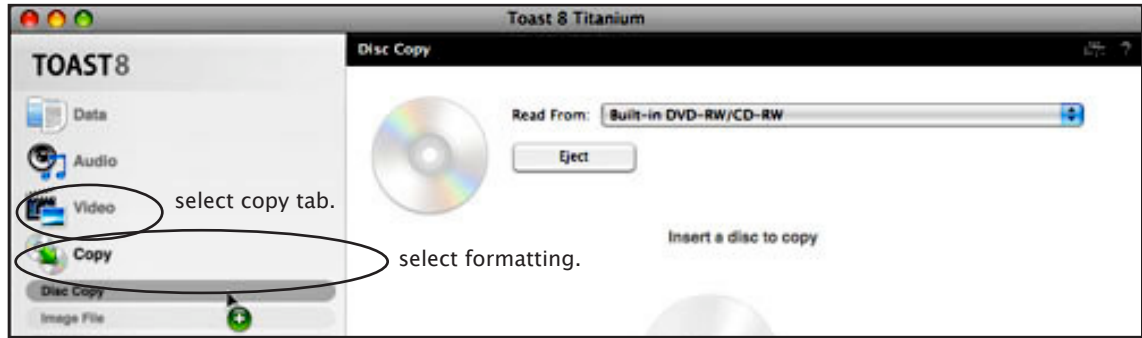

Overview of Copying a Disc

What kinds of Discs can you copy?

- Audio CD or MP3 disc.
- iDVD or Toast video disc.
- Backup data disc.
- Any single-session Macintosh disc.
- Any single-session Windows disc.
- A simple cross-platform disc (readable by Macintosh and Window, where mac users can see Windows data and vice versa).

1. Click the Copy tab. Select disc formatting.

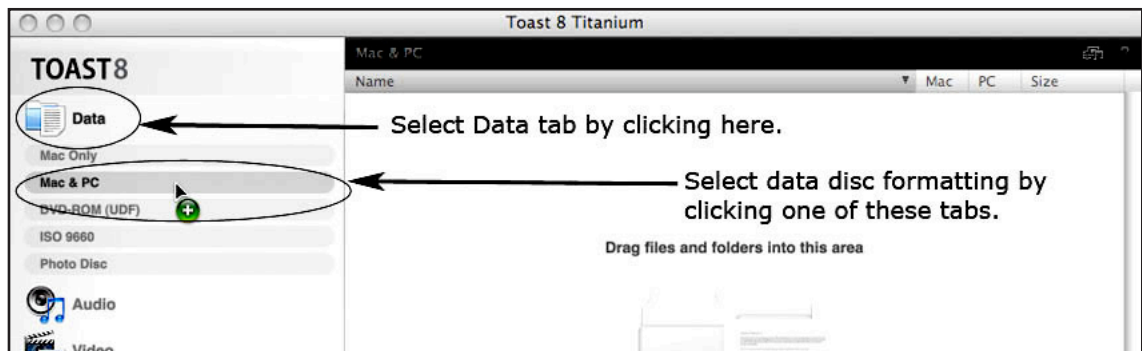

Toast should automatically detect any disc that is already in your computer, and display its name in the copy content area. Otherwise, insert the disc you want to copy, and Toast will display the name of the disc in the Copy content area.

2. Click the red Record button.
3. When prompted, insert a blank disc into the currently selected recorder.

Toast displays a progress bar as it copies your disc.

Burning a Data Disc

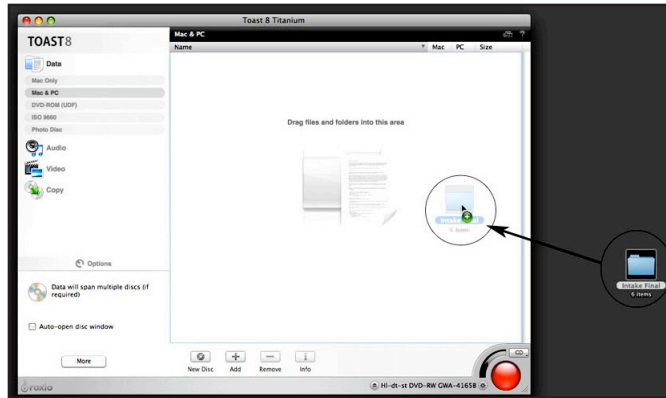

1. Click the Data tab. Then, select how you would like your disc to be formatted, as shown below.

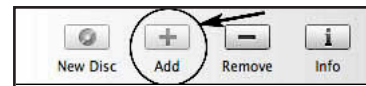

* It's recommended to use the Mac & PC formatting option. This will allow you, or anyone who might end up using the disc, to use it in both Macs and PCs.

2. Add files or folders to a data disc:

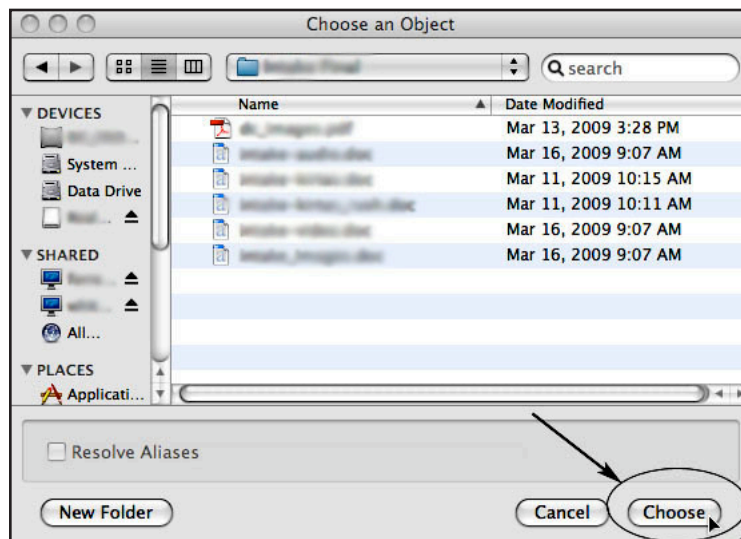

With the Data tab already selected, select and drag files or folders from any location on your hard disk to the Data content area.

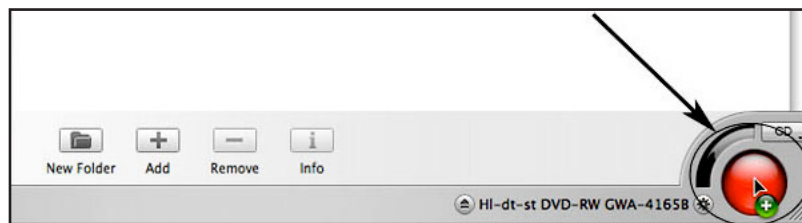

OR, with the Data tab selected, click the Add button.

The Open dialog appears, where you can browse your hard disk for files and folders. Select the files and folders you want to add, and then click Choose.

3. To Burn Disc, click the Record Button.

4. When prompted, insert a disc into your disc-burning drive.

Burning an Audio CD

1. Click the Audio Tab. Then select how you would like your disc to be formatted, as shown below.

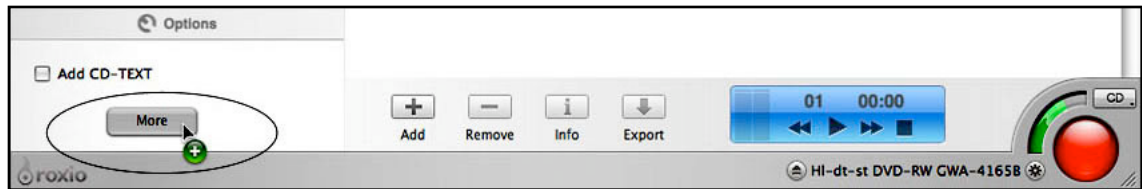

2. Add audio files to your audio CD from the Hard Drive:

With the Audio tab selected, drag audio files from any location on your hard disk to the Audio content area. This method for adding files is displayed under Burning a Data Disc, step 2.

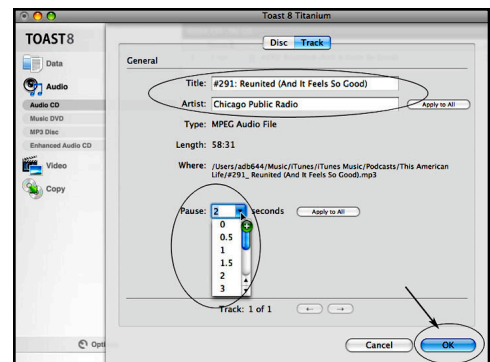

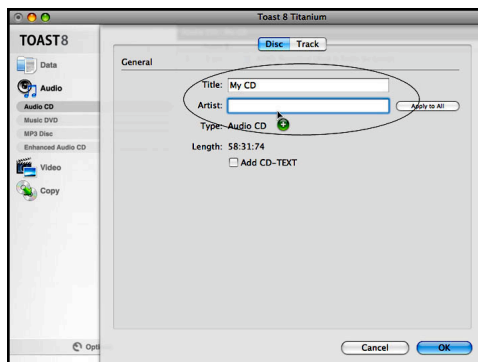

OR

With the Audio tab selected, click the **Add** button. The open dialog appears, where you can browse your hard disk for audio files. Select the files and folders you want to add, and then click **Choose**. This method for adding files is also displayed under the section, Burning a Data Disc, step 2.

3. In the Audio tab, click the “More” button under options to change your disc and individual track information. (optional)

4. Change the information under Disc and Track as desired. (optional)

5. To burn audio CD, click the red Record button.

6. When prompted, insert a disc into the currently selected recorder. Toast displays a progress bar as it records your audio CD.
